

E-Zee Cut® Performance

~ A Medium Weight Woven Cut Away Stabilizer

E-Zee Cut® Performance is a low profile, woven Cut Away stabilizer. It provides low visibility for use with lightweight fabrics. The low profile, sheer quality prevents the “badge effect” that is common when too heavy a stabilizer is used. Use with high performance wear, knits and loosely woven fabrics. Ideal for designs with up to 8,000 stitches. Two pieces may be used together for larger and/or more dense designs.

How to use Woven Cut Away Stabilizers

1. Cut a piece from a roll or use a piece of pre-cut E-Zee Cut® Performance. If extra stability is needed, up to 2 pieces can be used.
2. To hoop, if combining with a Tear Away stabilizer, place the E-Zee Tear® stabilizer down first, then sandwich the E-Zee Cut® Performance stabilizer between the garment on top and the E-Zee Tear® Away stabilizer on the bottom.
3. Embroider the design and remove the embroidered item from the hoop.
4. Trim the excess stabilizer with a sharp pair of scissors or shears, leaving approximately ¼” around the out side of the design. Rounding the corners instead of leaving them square or pointed will avoid curling later on.

Available in these sizes:

Pre-cuts - 250 pieces per pack
• 7.5” x 8”

Rolls
• 20” x 50 yards

Available in white and black

Please Note

To avoid nicking the fabric when trimming away E-Zee Cut® stabilizers, hold the stabilizer while trimming and let the garment drape. Be sure to face it so you can see both the edge of the design and the fabric while you are trimming.
